Profile

A highly motivated 3rd-year Computer Science Engineering student with a strong foundation in programming and problem-solving. Passionate about learning new technologies and applying theoretical knowledge to real-world applications. Seeking opportunities to enhance skills and contribute to innovative projects.

Skills

Languages: C++, C, Java, Python

Web development: HTML, CSS, Tailwind CSS, JavaScript, React.js, node.js, express.js

Data Structures and Algorithm: Sorting, Arrays, Binary Search, Greedy Algorithms, LinkedLists, Stacks and Queues, Binary Trees, Graphs, Dynamic Programming (DP), Tries

Others: OOPS

Technologies: Git and Github

Education

Vellore Institute of Technology B.Tech Computer Science and Engineering, CGPA: 9.59	August 2023-present Vellore, Tamil Nadu
Shri C. C. Shah Sarvajanic English High School, Gujarat Secondary and Higher Secondary Education Board, Class 12th	June 2022- May 2023 Surat, Gujarat
Shri C. C. Shah Sarvajanic English High School Gujarat Secondary and Higher Secondary Education Board, Class 10th	June 2020- May 2021 Surat, Gujarat
Resonance JEE Mains-36639, JEE Advanced-17931, Class 12th	June 2019- May 2023 Surat, Gujarat

Projects

Project Management System | MERN Stack

- Built a multi-tenant project management platform with Google Sign-In and email/password authentication, cookie-based session handling, and workspace creation with an invite system for team collaboration.
- Implemented project, epic, and task management (CRUD operations) with task status, priority, assignee, filters, search, and pagination for efficient workflow organization.
- Designed role-based permissions (Owner, Admin, Member), integrated analytics dashboard, and used MongoDB transactions to ensure robust data integrity with seeded test data.

Plan Wisely – Task Scheduler | HTML, CSS, Javascript

- Developed a dynamic task management system to enhance productivity and workflow efficiency.
- Implemented priority-based sorting, deadline tracking, and real-time task updates.
- Designed an intuitive user interface with dark mode and interactive task management features.

E-Commerce Management System using OOP | C++

- Built an OOP-based e-commerce platform with browsing, cart, and checkout features.
- Added role-based modules for customers and admins to manage products, stock, and orders.
- Applied inheritance, polymorphism, and encapsulation for scalability and maintainability.

Achievements

Branch Topper: Achieved the distinction of being the branch topper in the 1st year of BTech Computer Science and Engineering.
